SUPPLEMENTARY MATERIAL

SURVEY

- 1) General information
 - Name:
 - Position:
 - Hospital:
 - City/Town:
 - State/Province:
 - Country:
 - E-mailaddress:

- 2) Please provide us with a rough estimate of the total number of pediatric patients currently undergoing renal replacement therapy in your country.
 - Number of patients on chronic HD
 - Number of patients on chronic PD
 - Number of transplant recipients

- 3) If chronic HD, PD or Tx is offered to children in your country, who is in charge of their treatment? Please choose from the list:
 - Mostly or exclusively pediatric nephrologists
 - Joint management by pediatric and adult nephrologists
 - Mostly or exclusively adult nephrologists
 - This treatment is currently not offered to children in my country

If none of the possible answers to the preceding questions correctly describe the situation in your country, please feel free to add additional comments here.

- 4) Are pediatric patients on renal replacement therapy currently followed in one or several registries in your country? Please provide answers for the children on HD, PD and Tx respectively. Answers are not exclusive, so please tick all correct answers.

HD

- No HD patients from my country are currently followed in a registry.
- All HD patients from my country are followed in a national registry.
- Some but not all HD patients from my country are followed in a national or regional registry.
- All HD patients from my country are followed in IPDN.

PD

- No PD patients from my country are currently followed in a registry.
- All PD patients from my country are followed in a national registry.
- Some but not all PD patients from my country are followed in a national or regional registry.
- All PD patients from my country are followed in IPDN.
- Some but not all PD patients from my country are followed in IPDN.

TX

- No Tx patients from my country are currently followed in a registry.
- All Tx patients from my country are followed in a national registry.
- Some but not all Tx patients from my country are followed in a national or regional registry.
- All Tx patients from my country are followed in an international registry.
- Some but not all Tx patients from my country are followed in an international registry.

Please feel free to add additional comments here.
